

TECHNICAL UNIT POP UP3™, TU 30

- Technical Unit for the POP UP3™ vacuum toilet system;
- CE Certified;
- Maximum capacity: 10x POP UP3™ Units = 30 vacuum toilets;
- All electronics housed in water resistant cabinet;
- All water, waste water and electric connections placed inside the unit;
- Robust unit on a steel galvanized frame;
- Galvanized steel frame with spool and box for storage and transport for hoses Press and Vacuum and connection material.

Description	Specification
Article number	2001006
Article	POP UP3™ TECH UNIT 30
Capacity	30 vacuum toilets = 10 POP UP3™ units
Galvanized steel frame, equipped with	<ul style="list-style-type: none"> • 1x 95MBA Vacuum pump (330 litres) • 1x Water pressure pump • 1x Water buffer tank with filter 180 litres • 1x Electric control unit (400V – 32A) • 2x Frequency controller • 1x Filter unit for filtering waste before entering the vacuum pump • 3x water supply connections to POP UP3™ units with GK couplings • 3x waste connections with Camlock couplings • 1x LED lights with motion sensor • Copper and LDPE connections • Unit covered with canvas covers, elastic bands and hooks, laminated plating on the backside for protection against weather and transport
Power consumption	380V/32A/12kVA (12kVA is only needed for starting up the system)
Weight	1.150 kg
Size	120 x 240 x 120 cm
